Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

In response to applicant's amendment dated October 26, 2007. The following action is taken:

The claims are rejected for substantially the same reasons set forth under the Double Patenting, 35 USC 102 and 103 rejections.

Applicant's arguments filed October 26, 2007 have been fully considered but they are not persuasive. In response to applicant's argument centered around the 112 first paragraph rejection. The argument is moot and the 112 first paragraph rejection is withdrawn. In response to applicant's arguments centered around the 102 rejection based on the Azuma et al reference. Applicant's arguments are centered around the prior art not showing the newly added limitations in the claim "wherein the medium is supported on a substrate in which....the device". The limitation "topography" is interpreted by the examiner as "data" represented by zeros or ones on the disk. the medium shown in the reference is supported by a substrate and the device "FET" having a source, drain and channel is shown in the reference. Applicant's argument drawn to the reference showing the reading of the medium by "conductivity" and not by it's distance is moot. It is well established in the art that the reading data using "EFT" is based on the changes in the distance between the medium "data" and the probe. Such minute distance changes the thermal conductance indicative of the data on the medium. Thus the limitation distance between the data bit is present within the well established fact of using the EFT as the medium reader. In response to applicant's argument with

respect to Binning reference. Applicant's arguments are centered around the art not showing the newly added limitation in the claims. However the use of a Drain, channel and source is within the structural element of "EFT" and such limitations are present within the secondary reference.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
